The Democracy of Reconciliation According to Hezboallah

Dr. Asad Kadim Shibieb

college of Political Sciences / University of Al - Kufa

Abstract

Hezboallah, one of the influential parties in Lebanon established in 1985, secured not in a long time ago a political game, The Democracy of Reconciliation, as means to share the power among the Lebanese disputing parties and sects. Hezboallah's first political participation was in 1992 after accepting the collective reconciling work, which is known as "lebananah", to make Lebanese. Therefore, Hezbollah accepted the democracy of reconciliation as foundation to distribute various authorities among the Lebanese parties as a temporary solution. Hezbollah staff thought even though that the democracy of reconciliation was a political solution, there were some critical observations, which indicated that it would increase the social division.
